Education

(B. Tech.), Electronics and Telecommunication, **A.G. Patil Institute of technology, Solapur(2025)**

Skills

Figma, Sketch, UI & UX Design, UX Research, Wireframing, Prototyping, Typography, HTML5, CSS, Photoshop, Adobe illustrator, Micro InterAction, Sitemaps, Mockups, Color pallets, Python, GUI in Tkinter

Summary

I am proficient in UI/UX and frontend design, skilled with Figma, Sketch, HTML, CSS, and Adobe Suite. I've worked on projects like an AWS Console clone, a company performance dashboard, and an e-commerce platform, showcasing my ability to create intuitive and visually appealing designs. I also created a modern, responsive website for a dentist, ensuring it looks great on all devices. I love turning ideas into user-friendly and attractive designs. Let's collaborate and build something amazing together!

Projects

Smart Home App ([LINK](#))

- Spearheaded the design and prototyping of an innovative Smart Home app using Figma, integrating advanced design techniques such as interactive components, fluid animations, and real-time feedback mechanisms.
- Created an intuitive user interface that simplifies the control of smart home devices, featuring a cohesive design with clear navigation, easy-to-use controls, and personalized device management options.
- Exploited Figma's capabilities to craft high-fidelity prototypes with interactive elements, demonstrating the app's functionality through dynamic animations and responsive design to showcase real-world interactions.
- Employed a methodical design approach, organizing features into well-defined frames and utilizing auto-layout to ensure a visually harmonious and user-centric experience that enhances the management of smart home systems.

Prototype and animation ([LINK](#))

- Orchestrated the design and prototyping of a company performance dashboard using Figma, leveraging advanced design elements such as color palettes, frames, and auto-layout.
- Implemented intuitive and user-friendly design principles to create a visually compelling dashboard that effectively represents key performance metrics and data.
- Demonstrated expertise in Figma's features, utilizing color pickers and auto-layout to ensure a cohesive and aesthetically pleasing design that enhances the overall user experience.
- Applied a meticulous approach to design, organizing information within frames to create a structured and easily navigable dashboard interface for efficient data analysis and interpretation.

Chat App ([Link](#))

- Led the design and prototyping of a dynamic chat application using Figma, incorporating sophisticated design elements such as interactive components, transitions, and animations.
- Developed a seamless user experience by employing intuitive design principles, including user-friendly chat interfaces, streamlined messaging flows, and engaging notification systems.
- Showcased proficiency in Figma's advanced features, utilizing interactive prototypes and animations to bring the chat app to life, demonstrating smooth transitions between chat screens and real-time message updates.
- Adopted a structured approach to design by organizing elements into frames and employing auto-layout to ensure a responsive and visually appealing chat interface that facilitates effortless communication and enhances overall usability.

Experience

Made a design for dentist

- Spearheaded the design initiative for a dentist website, utilizing Figma and other design tools to create a modern and engaging online platform that showcases the dentist's services and expertise.
- Developed a responsive design that adapts to various devices and screen sizes, ensuring an optimal user experience.
- Employed thoughtful color choices, typography, and layout strategies to ensure a visually appealing and professional design that aligns with the dentist's brand identity and values.
